

PRODUCT INFORMATION SHEET

CONDUCTOSPHERES™

M-60

Hollow glass microspheres coated with silver. This product is the lightest with a true particle density of only 0.16 g/cm³.

Typical Properties

Appearance:	Light grey/tan powder					
Median diameter: (by volume)	74 µm					
True particle density:	0.16 g/cm ³ (10 lb/ft ³)					
Bulk density:	0.10 g/cm ³ (6 lb/ft ³)					
Silver content, weight %	32 %					
Average silver thickness:	50 nm					
Particle size, by volume:	%<	5	10	50	90	95
	Size µm	29	38	74	107	116
Isostatic crush strength:	300 psi
