PRODUCT INFORMATION SHEET

PHOTOSPHERES[®]

Hollow glass microspheres coated with photocatalytic titanium dioxide.

Typical Properties

Appearance:	White powder					
Median diameter:	45 μ m					
True particle density:	0.22 g/cm ³ (14 lb/ft ³)					
Particle size, by volume:	%<	5	10	50	90	95
	Size μ m	10	15	45	77	85
Isostatic crush strength:	2000 psi					

Distributed by:

449 N. Hope Ave, Santa Barbara, CA 93110, USA
